

**OPEN-TO-VIEW VIDEO TELEPHONY CALL
IN A WIRELESS COMMUNICATION DEVICE**

5

ABSTRACT

A method (200) and an apparatus (400) for a wireless portable communication device (104) having a video telephony communication capability for responding to an incoming call are provide. The wireless portable communication device detects the incoming call and determines whether the incoming call is a video telephony call. If the incoming call is a video telephony call, then the wireless portable communication device configures itself for video telephony communication. Then upon receiving a single input signal, the wireless portable communication device activates required video functions and completes the incoming call.
